

ERM CVS

“The value of sustainability assurance and strategies to enhance its business impact”

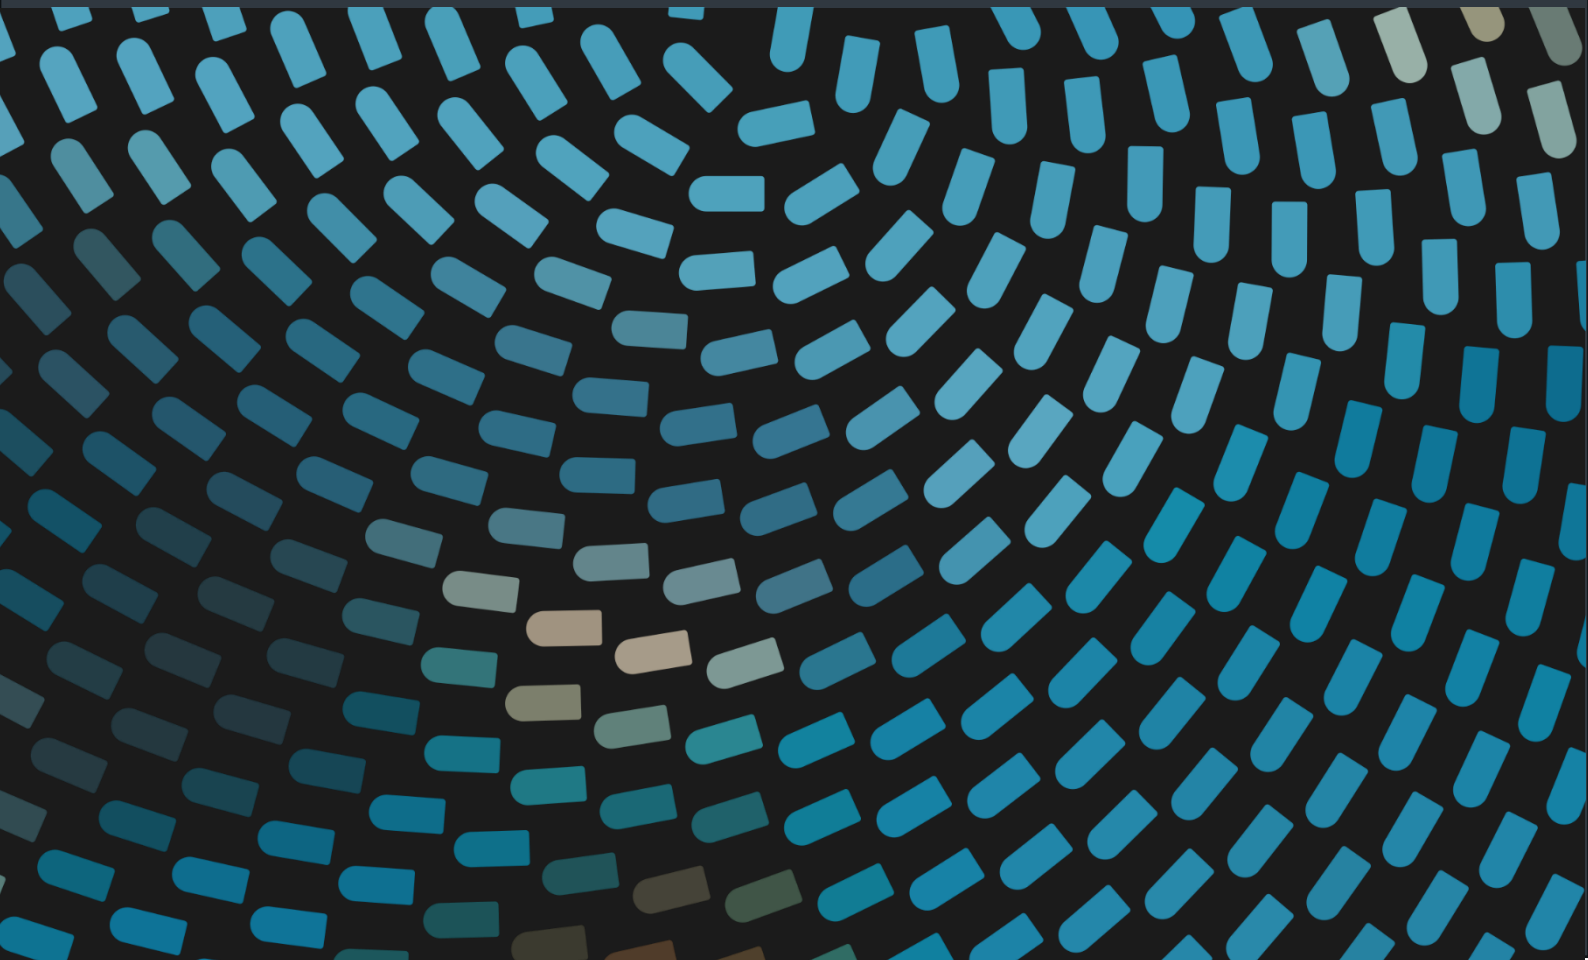

Expert Spotlight Series

IN-PERSON EVENT

22ND MAY 2025

Breakfast event
8.30- 11.30

CENTRAL LONDON
(near Liverpool
Street Station)

Key Agenda Topics

Join our exclusive breakfast event where we will uncover cutting-edge trends in sustainability and explore how you can use assurance and ESG to propel your business to new heights! This is a fantastic opportunity to network with industry leaders, participate in collaborative discussions, and gain valuable insights and practical tips from assurance experts.

- **Sustainability is here to stay: Global Trends and the Long-Term Value of Sustainability**

Sustainability offers long-term value amid geopolitical and regulatory volatility. We will share global insights on aligning with stakeholder expectations and the crucial role of assurance in achieving this value.

- **Implement ESG and Sustainability Assurance to add value**

Discover tips to maximize assurance value and insights into why organizations seek assurance beyond regulatory compliance. Explore the impact of recent regulatory changes, including the Omnibus update and the CSRD. We will share our latest insights on the convergence of financial and sustainability reporting, and its implications for aligning supplier strategy with business goals.

- **The critical role of assurance for Sustainability-Linked Loans and other forms of sustainable finance in driving down borrowing costs**

Sustainable finance promotes investments in environmentally friendly, socially responsible, and well-governed projects. Learn about market dynamics and its role in reducing financing costs and assurance considerations as part of implementation.

- **Mitigate Greenwashing Risks While Maintaining Market Advantage Through Sustainability**

Consumer trust is crucial; greenwashing can occur even with good intentions. But today, hefty financial costs of greenwash accompany the traditional reputational risks. Discover steps to mitigate this, with a deep dive into the regulations and how best to apply them within your organization.

- **Enhance Business Performance Through Upskilling and Certification**

Certification and management systems drive sustainable growth. Learn how to create impact and upskill teams in sustainability and auditing to enhance compliance and improve organizational efficiency.
